

10 YEAR EXTENDED WARRANTY

As part of the AVK Group, we pride ourselves on being one of the world's leading international valve manufacturers for the water, sewage, gas and firefighting industries.

AVK Valves manufacturing quality now offers the peace of mind of a 10 year warranty against design, workmanship or material defects for all Australian manufactured products including gate valves, butterfly valves, hydrants, check valves, service connection valves and accessories.

The confidence we have in our quality systems that control the manufacturing processes at our Wingfield plant is what allows us to offer this 10 year warranty from the date of despatch from AVK Valves.

Most of our products are made in South Australia to the highest quality, meeting or exceeding Australian standards. When you are looking for the highest quality valves and accessories with the lowest 'whole of life' cost, look for the AVK logo.

In addition, AVK also warrants the wedge component manufactured in all resilient seated gate valves. This warranty covers all Australian and International manufactured wedge components.

The wedge is fully vulcanised with rubber both internally and externally. With this design no unprotected iron parts are exposed to the medium and the excellent rubber vulcanisation prevents creeping corrosion underneath the rubber.

The high quality of AVK rubber is characterised by:

- High flexibility, no permanent deformation possible
- High durability, no wear of the rubber even after 10,000 operation cycles
- High impact resistance preventing damage to the rubber surface
- Low friction ensuring low closing torque
- EPDM rubber resistant to acid remains and NBR rubber resistant to oil remains

This extended warranty is an addendum to the AVK Valves Pty Ltd "Warranty Claims & limitation of Liability" clause in its Standard terms and Conditions of Quotations, Sales & Delivery.

AVK Valves Pty Ltd warrants the resilient wedge component in its Series 55 and 57 Gate Valves to be free from defects in design, workmanship and materials for a period of ten (10) years from the date of despatch from AVK Valves Pty Ltd. Under this extended warranty, the product has been properly applied and used under normal waterworks service to a maximum of 40° Celcius as per the Scope of the Australian Standard AS 2638.2 - 2006 and under conditions for which it is designed.
