## Company Profile & Mission Statement

AVK Australia Holding Pty Ltd and its subsidiaries (the Company) is an Australian registered company, part of the internationally recognised AVK Group of companies.

A Technology Centre located in Denmark ensures coordination and close association between all Group companies located in more than 25 countries worldwide. This ensures state of the art in terms of valve technology materials, and production techniques are maintained thus ensuring precision and uniformity together with high quality at competitive prices.

Valves and related products are produced for such diversified applications as Water, Gas and Sewage applications as well as Fire Hydrants Services; specific valves of each application being readily available upon request in our product program contained in our Company's Portfolio.

The Company's product range holds approvals by and to more than 50 International Standards world wide, including Standards Australia (AS).

Our future aims are continued and progressive business expansion whilst maintaining and improving the quality of products & services provided to our customers.

At all times will we operate with total integrity and with an uncompromising approach to Quality and the Work Health, Safety and Welfare of our staff.
